

FISCAL MEMORANDUM

SB 665 - HB 920

January 21, 2022

SUMMARY OF BILL AS AMENDED (006203, 011232): Adds cerumen management to the authorized scope of practice to be performed by a licensed hearing instrument specialist under the Council for Hearing Instruments Specialists (Council). Requires a licensed hearing instrument specialist (specialist) to: (1) follow regulations established by the Council regarding cerumen management; (2) carry appropriate professional liability insurance before performing cerumen removal; and (3) maintain proper infection control practices.

Sets out criteria for when a specialist is required to refer a patient to an otolaryngologist or a licensed physician. Prohibits a specialist from requiring a patient to sign a form that eliminates liability if the patient is harmed.

Authorizes specialists who hold a certification of a cerumen management course approved by the International Hearing Society to practice cerumen management, or the removal of impacted ear wax. Requires courses be overseen by a physician and consist of at least six hours of practicing techniques.

FISCAL IMPACT OF BILL AS AMENDED:

NOT SIGNIFICANT

Assumptions for the bill as amended:

- Pursuant to Tenn. Code Ann. § 63-17-201, hearing instrument specialists are authorized to sell and instruct hearing instruments and make an impression of the ear or ear mold.
- The proposed legislation would authorize hearing instrument specialists who hold a certification of a cerumen management course approved by the International Hearing Society to practice cerumen management, or the removal of impacted ear wax.
- According to an October 16, 2020, public meeting of the Council, hearing instrument specialists are not currently authorized to remove impacted ear wax and must send patients to a medical physician if the practice is required.
- The proposed legislation would authorize an additional scope of practice for current licensed hearing instrument specialists, but would not increase the number of specialists licensed by the Council.

- The International Hearing Society has a public course available for cerumen management; however, it is assumed any fees associated with receiving certification of completion of such course would be paid to the third-party provider.
- The Council can accomplish any necessary rulemaking to adhere to the provisions of the proposed legislation within existing resources.
- Pursuant to Tenn. Code Ann. § 4-29-121, all health-related boards are required to be self-supporting over a two-year period. The Council for Hearing Instruments Specialists had an annual surplus of \$18,749 in FY19-20, an annual surplus of \$37,851 in FY20-21, and a cumulative reserve balance of \$115,494 on June 30, 2021.
